

## Premium Protection System

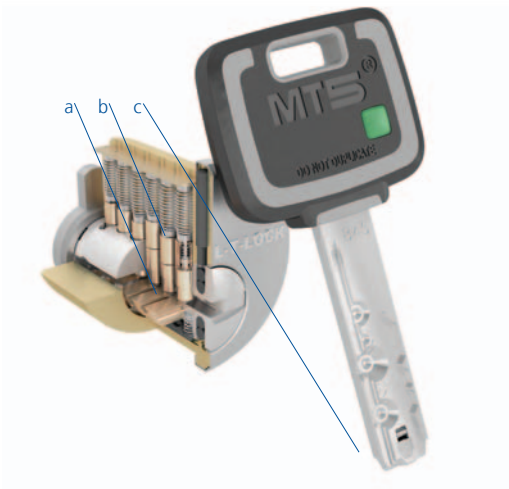

# Innovative Triple Mechanism Technology

Mul-T-Lock's patented MT5<sup>®</sup>+ cylinder platform integrates three advanced technologies for enhanced security and heightened key control.

As leader in High Security locking systems, Mul-T-Lock's MT5+ platform is designed for improved protection, flexibility and convenience.

MT5+ provides a combination of protective elements to create triple mechanism locking:

- **Extra security** — A powerful locking bar mechanism interacts with unique horizontal finger pins for enhanced security.
- **Advanced configuration** — Leveraging Mul-T-Lock's well-honed telescopic pin technology, MT5+ enjoys the latest generation of this field-proven mechanism.
- **Patented protection** — The Alpha Spring, a patented mobile interacting spring sits at the key's tip and engages a unique pin at the rear of the mechanism, creating an additional shearline.

a - Mul-T-Lock telescopic pin technology  
 b - Side bar locking mechanism with unique horizontal finger pins  
 c - Patented mobile interacting Alpha Spring

## Advanced Key Control

You can rest assured that the maximum effort is being made to reduce unauthorized key duplication. The MT5+ secure-key system is enabled through a unique key authorization magnetic strip card. Only when the magnetic key card is presented to dedicated MT5+ locksmiths, whose KC5 key cutting machine is authorized for your MT5+ profile, can the required key code be configured.
